HiBuilding my first Bottlehead kit and looking for some high efficiency speakers to mate with it. Was looking at Cain and Cain, then Cornwalls, but am now intrigued by Wayne's offerings. Considering Theatre 4, or the Professional 7 kit using the 4 box as a bass bin instead of the corner cabinet specified in the 7. Looking for anyone in the GTA or Niagara peninsula who has Pi speakers and would be interested in discussing their characteristics, and if possible, to arrange to hear them. Thanks, Mark
