Hey everyone. Someone recommended these speaker kits to me and so far they look great when compared to expensive, rip me off, companies. I just have a few questions before I purchase the Stage Seven Pi-181. Would you recommend a Separate Enclosure for the Subwoofer?2. What type of enclosure should be needed for the sub and midrange(if needed)3. If i wanted to get creative and create a mid woofer horn would it complement the crossover design?4. What would be the best overall design to complement these speakers(to sum it all up)?Thanks so much,Kyle LPoor DJ from Georgiap.s. The subwoofer bass horn is the coolest thing i have ever seen....nice work.
