Wayne, as you know I am building some 7pi-18's for my older son. I just picked up some Altec 811b's for the 4pi Theatre's I am building for myself. My son wants to use the 811b's (in place of the H290's) with the PSD2002's on his 7pi-18's. Any crossover changes recommended for either of these speakers?
