As you know Wayne, I have purchased some Altec 811b horns for the 4pi Theatres I am building. In searching through the Pi Forum archives I found where you had posted this: "The PSD2002

You can really consider the whole kit to be a good second source to Altec components for the Model 19 loudspeaker, but swap the polarity of the HF driver."Why the polarity swap? http://www.audioroundtable.com/PiSpeakers/messages/16909.html
