Hi! wayne thanks for the plans for the pi 2 towers I'm going to order the speakers from your website, but I have a question about the size of the hole for the speaker wires, and the other is about the braces they should be all along the cabinet or small sections? and did you recommended to put the box together with secrews or finishing nails, and last insulation if you can be little more specific,and I almost forgot in my line of work we use fiber glass duct board rigid 1 1/2" tick with an r value of 6.5 can that be used to insulate the speakers Thanks Mario....
