Hi WayneHaving just returned from a big hifi show, many manufacturers had horn speakers on show.THe horns varied in size, orientation, and the compression drivers varied in size.For novices such as myself, I wonder if you'd be so kind as to discuss the merits of your new wooden horn (an option on the 7 I understand, and other speakers too?), why you designed it that way.. and what you feel about different types of horn shapes in general.It's an interesting topic I think, and one I'd like to hear more about.Thanks!C Smith.
