Subject: Re: Pi 7 - How do they sound? What drivers? Build Difficulty? Posted by Wayne Parham on Sun, 13 May 2007 14:34:29 GMT View Forum Message <> Reply to Message

The Professional Series version with the JBL 2226 sounds best to me. Remember that distortion products are harmonics of the fundamental and fall right into the midrange. Even with a low crossover point, this is true. So the use of a high-quality, low-distortion woofer is very important to overall sound quality.
