Hy .Wayne ....Iam planning to build the follow speaker =a 2Pi tower as bass bin woofer atop the 7Pi mid-horn but instead of the recomend Eminence 10 inch driver goes the 8 Alpha MR and last a Eminence CD tweeter. So that the 8 Alpha MR goes good from 400Hz and up what changes must to do to make that 7Pi X-over have 400 Hz & 2Kh cutof frecuencies .For your help Thanks in advance Wayne .
