Ok gang...what happens if you move to a place where there are no corners available for a Theater 7 corner horn? The cabinets are almost complete, except the midhorns. Is there a way to use the parts for a traditional speaker..not a corner model, or do I sell the stuff and start from scratch? Our new place has no room for cornerhorns. I would sell the setup and consider a smaller set for our new place. Stuff happens, you know? I hate to do it, but there's no room for thes guys here. Thanks!Ed White
