Subject: Re: nearly ready for Pi speakers in the UK! Posted by Chris R. on Tue, 18 Dec 2007 01:01:56 GMT View Forum Message <> Reply to Message

Wayne, Not knocking JBL, but with the corner horns crossing at 200Hz-300Hz, are you into the range where the shorting ring works? I have some JBL music instrument speakers that sound *significantly* better than the Eminence drives I have, and those don't havethe shorting rings and what not. JBL really has it going on. Chris
