I just had a look at the crossovers today and I didn't remember all to values correct, this is the values I'm using: $C1 = 0.47\mu F$ $C2 = 10\mu F$ $R1 = 11\text{ohm}$ $R2 = 33\text{ohm}$ When I simulate them in Spice, it seems the $f3$ might have shifted down a bit.
