The 2206 works well in boxes from 1ft³ to 3ft³, tuned from 50Hz to 60Hz. As you move towards the large end of this scale, you should also move towards a lower Helmholtz frequency. The 1ft³ box tuned to 60Hz has f₃ of 70Hz. The 3ft³ box tuned to 50Hz is an EBS alignment with f₃ of 50Hz.
