It's a good tweeter, but voltage sensitivity is a little too low to match with the Alpha 10. You could pad the midwoofer, but I don't think I would do that. What about one of the high sensivity ribbon tweeters? Some of them are very expensive, but some are under \$100, and a few under \$50. Here are two that have the right voltage sensitivity to work. Might need a smidge of padding on the Aurum Cantus, maybe 1dB or 2dB.Aurum Cantus G2Si Ribbon TweeterDayton PT2C-8 Planar Tweeter
