Subject: Re: Vifa DX25TG-05 vs. Vifa XT25TG30-04 Posted by Wayne Parham on Fri, 18 Apr 2008 04:25:47 GMT View Forum Message <> Reply to Message

I'm not sure, but I doubt it. The impedance of ribbon tweeters is usually pretty resistive and doesn't need extra damping or impedance compensation. You may need to pad the tweeter though. If so, I think probably a standard L-Pad configuration is appropriate.
