Subject: Circuit Protection Posted by Matts on Sun, 04 May 2008 22:24:45 GMT View Forum Message <> Reply to Message

What size (ballpark) amps require the use of circuit protection- i.e. the light bulbs- for the compression driver? I didn't use them in my Pi4's driven by 2A3's, haha, but am making a pair for a friend who uses SS. Am using B&C 250's and 2226's.
