Thanks I'll look forward to getting the plans. As for "a large coil" would you have a spec in mind, working in the area of Health Care and not electronics, the ones I have access to won't be any good!I have made my Bottlehead Paramours with switchable output of 4 and 8 ohms, but was considering the MagneQuest iron upgrade, but these are only available at 8 and 16 ohms - always the option of a plate amp as you suggested earlier.Paul W.
