Subject: Premium Stage 4 Pi - what are they worth? (Pics)

Hi Everyone,Built these about 7 years ago and really enjoyed them in my old house, but unfortunately just don't have the room for them in my new place. I hope I'm not breaking any rules here, but I do plan to advertise them locally and potentially parting them out (drive units and crossover) on Ebay as shipping these monsters would cost a small fortune. I might just keep the cabinets and perhaps someday will build some newer, updated Pi's using them. For those who remember, the Premium Stage 4 Pi used to be based on the Eminence 15" Kilomax, PSD 2002 compression driver, the Eminence 1k6 crossover with Wayne's tweeter compensation mods, and the cabinet design is modified with an EBS alignment for nice bass extension down in the mid 40Hz range. Cabinets are 3/4" MDF, then have 1/8" birch veneer and a little bit of bubinga trim on the sides near the top and bottom on each side. What are these worth? What can I expect to get for the drive units? If anyone is interested, drop me a note and I'll be sure to contact you when they go up on ebay. Or, if you happen to be in the Calgary, Alberta, Canada area, you could come and check them out.Colin
