No Thats a very old add from the early 70's. I listen to that Technoweb.com off shoutcast. It's all 60's pschycadelic music coupled with adds from that time period and DJ's from back then. It plays all day and the signal is good. The p[laylist in the time I wrote this has been Moodies with Tide Rushes IN, Beatles When I'm 64, Buffalo Springfeild Broken Arrow and Stones Dandyline as I close Jethro Tull is doing Sunday Feeling from the first album. It plays in my house all day now and my wife is holding a big knife and waiting for me to go to sleep. She says it goes or I go. First big giant speakers and now this, last night she pulled the plug on Captain Beefheart and The Magic Band; can't imagine why? Some of the most obscure psychycadelia you can imagine.
