Those look excellent, and look really good with the rest of the room. They fit in very nicely with the other woods! It's a really good looking box that's not too large for a bass reflex. I've come to put a small piece of plywood under the front of mine when I'm playing something with a louder electric bass or anything that's bass heavy, and I leave 'em flat on the floor when listening to acoustic bass or naturally recorded small combo. Enjoy!!
