Hi Wayne, I finally started to build my new-old project - 4 pi pro-like using Beyma 15M300, JBL 2426h & Eminence H290. I've two questions: I saw that you've developed recently new crossovers, I'd like to ask if it fits also to my configuration - or I better stay with the old-one. Is there any benefits (audiophile point of view) to add Deltas in mid-horns to this configuration ? Could you resend me plans for this configuration please ? Thank you in advance, Vlad.
