Hi All, here are pics of my Jensen Imperials with EV SP-15 woofer. I will but the riser off the top and replace the horns on top with the Pi midbass horn and the Pi tweeter horn, then adding the big Heil super tweeter on top of that. I am driving the woof with an Adcom GCA510 and the mid and tweet horns with a 300B amp, and the Heil with a Dynakit ST 70.
