I looked around my local Home Depot and spotted some decent looking plywoods. Upon cursory inspection, the surfaces looked very clear and I did not see any voids around the perimeter. AS I recall, the 3/4" stock was five or six plies. Would one of these also be a good choice for speaker cabinets, or should I continue to seek out Baltic Birch from a specialty supplier? 3/4" x 4' x 8' Baltic Plywood - \$49.88/sheet 3/4" x 4' x 8' Sanded Plywood (one surface only) - \$43.88/sheet
