---

Wayne, I measured a pair of Delta 15A pro drivers I have and this is the result using WT2:Revc  
5.7 ohmfs 40 hzQes .38Qms 3.99Qts .35Zmax 53 ohmLe 1 mHeff 97.8  
db/watt (3.874 %)Vas 8.3 cu ftThe other driver measured really close to these specs also! I'm  
looking at using a 7.75 cu ft cab. What would you recommend for tuning the port  
frequency???

Regards, Ron
