Subject: 4 Pi baffle cutout question Posted by GarlandGarland on Wed, 17 Dec 2008 20:13:58 GMT View Forum Message <> Reply to Message

I noticed on the Eminence website where they specify a cut out dimension for the H290 horn of 10.3 inches by 4.9 inches, Yet, the 4 Pi baffle cut out document calls for 9.5 inches by 4.75 inches. Is there an error somewhere? Like maybe in my reading! Thanks.G.
