Subject: Any 7pi users in the San Francisco Bay Area?

Hi, Folks,I've recently moved to a new house in the Bay Area, and I won't have a dedicated listening room. The living room doesn't have _room_ for speakers to be out in the open, so I've been investigating corner horns. I'd really like to find a 7pi user willing to demo the horns - they're a bit pricey to buy or build from kit without having heard them first. I'm in San Jose. Is there anyone in the area who has Pi corner horns and is willing to show them off?
