The BP102 works best in 2.0ft3 to 6.0ft3 cabinets tuned to 30Hz. It is really intended to be a bass guitar speaker so the cone isn't damped like you would want for a midwoofer. It would work fine for hifi as long as it wasn't used above a few hundred Hertz though. So don't use it in a DI-matched two-way speaker. Use it in a three-way or as a flanking woofer in a distributed multi-sub setup.
