Wayne, no problem I have plenty of room, up to 16' from speaker wall to listening position and still 12' behind that to rear wall. Speakers are 10'c to c. I'm using a lounge chair with wheels so I can move easily back and forth while seated. I am the only person to listen so very small sweet spot is OK if necessary. I could care less about eavesdroppers. Best so far seems to be 12' from speaker wall which is about 11' from each speaker.     Zene
