Yes, prices were slightly increased this year. We haven't done an increase in a long time, weren't keeping up and were getting close to losing money. It's a labor of love for me so I don't need to make a bunch of money to stay in business but I don't want to take a loss either.The kits only went up 10 bucks, so I don't think it will hurt anyone. But if I take the time to solder the cable assemblies and crossovers, print the plans, package the kits and take them to UPS, I sure don't want to do it at a loss.
