Subject: Alpha 10 modeling Posted by solomty on Fri, 17 Apr 2009 21:09:16 GMT View Forum Message <> Reply to Message

Hy Wayne. Just model Alpha 10 with WinISD and the resulting graph is a very impressive. 29.4Hz @ - 3db in a 10 cf box a very big box for sure. Could tell me how compare your two Pi tower with 4.7cf against the 10cf box? Thanks
