Wayne, thanks for the advise and the plans. As far as powering the pi 3's, what should I plan on. We have a large pro audio Altec amp that is advertised as 400 x 400. I'm not sure if it's 2 ohm stable. Are the 3's 8 ohm or 4 ohm? Sounds like 3's are the way to go with most of the gigs being in small bars. Is that what your recommending?OneBean
