the boss of this forum certainly doesnt like me,and is waitn for a chance to kick me off :pl enjoy talking with audiophiles(for a short time) to see exactly what their up to.But some of them just get plain nasty!They have their beleifs,and i have mine.One of mine being beleif in the auditory perception issues,and the fact that we dont know everything about the brain :PAlso being a christian,i enjoy keeping the faith to the spiritual side,not the Physical world where science belongs. Without science were lost.Cheers
