I do not read the stereophile mags but I have madeinquiries in news groups about what's the bestclassical music webstream. Regularly I have on KCNV even though I don't liveanywhere near Las Vegas. Most recently I got a tip for KUSC. My soundcard is a Turtle Beach Santa Cruz which uses Cirruschipset. I'm wondering what is a good upgrade path for webstreamingor if it's even relevant rather than quality of the streamitself. And how does broadband change any of it for listenability?The only target item I've been looking at is the M-Audio Revolution 7.1.
