I do not read the stereophile mags but I have made inquiries in news groups about what's the best classical music webstream. Regularly I have on KCNV even though I don't live anywhere near Las Vegas. Most recently I got a tip for KUSC. My soundcard is a Turtle Beach Santa Cruz which uses Cirrus chipset. I'm wondering what is a good upgrade path for webstreaming or if it's even relevant rather than quality of the stream itself. And how does broadband change any of it for listenability? The only target item I've been looking at is the M-Audio Revolution 7.1.
