I've enjoyed Coast to Coast for the last ten years or so. Most of the time I had to pick it up from a radio station several hundred miles away, most often WOAI 1200 in San Antonio. But for the last year it has been broadcast from a local station, KFAQ 1170 in Tulsa. Both are 50,000 watters so they boom out a signal for a long way.I've always liked Art Bell and was sad when he stopped doing the nightly show. But George Noory seems like a real nice guy too. I still enjoy the show very much. And did you know that Art is back to doing the show on weekend? Click on the radio - He's on the air right now.
