My friend works for a major trade union and they had a meeting in Seattle a while ago. He is telling me that the container ships departing for the Far East have almost nothing in them. They are arriving here loaded with consumer goods; electronics,clothes,furniture,mechanical parts and equipment etc.Leaving they are half-empty and what stuff is loaded is mostly waste products for the third world junk-yards and hay for draft animals.Those guys are all disgusted; will we see this on Fox News?Someone better wake up.Nice jobs report.
