To me, it's not ominous but beautiful. Einstein stated that if he had longer to live he would look more into the metaphysical world than the physical. Interesting? Go to www.whatthebleep.com On the left side index scroll down to I create my Day link. Read what the PhD chiropractor/scientist has to say about being a genius or being unconditional love...then to look for the sign that an observer (God) is paying attention.Have a Day!Pam Case
