To me, it's not ominous but beautiful. Einstein stated that if he had longer to live he would look more into the metaphysical world than the physical. Interesting? Go to [www.whatthebleep.com](http://www.whatthebleep.com) On the left side index scroll down to I create my Day link. Read what the PhD chiropractor/scientist has to say about being a genius or being unconditional love...then to look for the sign that an observer (God) is paying attention. Have a Day! Pam Case
