Here in Clifton Park NY (between Albany and Saratoga) the price early in the week was 2.65 9/10. Over night it went to 2.79 9/10. Then the next day it was a low of 2.89 9/10 to a high of 3.11 9/10. I know that at the gas stations I saw these prices they don't get a delivery every day so something tells me they are ripping people off. I am sorry, but I do not believe the cost of the gas, already refined and being delivered, is rising 20 cents a day by just existing. Late last week in New Hampshire and Vermont it was between 2.49 9/10 and 2.59 9/10 where the tax is lower. Martin
