LOL 'eating squirrel'Its just nuts isn't it? your house value goes up a couple hundred percent but you still have to spend more on the next house! California is just shock and awe for me. I made some trips trip Tenn when I was a little younger and always thought it was great. Great climate with about 4 weeks of winter by a north eastern comparison and not too hot in the summer. Great landscape with mountains and lots of waterfront lakes. Great people, just super friendly and honest with that no stress attitude. Possum too!
