My friend said yesterday: "Well, I saw a socialism, I see the capitalism, I saw the war and cities in fire, I saw dead people, I flew across the tank through explosion, I saw unjustice and politicians, I saw misery, I was in the hospital, I worked hard, and I fought for the country. And yesterday I bought gasoline for $8, I can`t buy the new tires. And all of that politics/economics/Laws are just against small people. They want our money and our souls. Screw them all."
