There were over 3000 civilian deaths in Iraq; the leaders of that fiefdom have implored the US to send more troops since they are on the brink of civil war. Now the Turks are looking for our blessing to attack the Kurds in the North becuase they are raiding the Turkish Towns for supplies. We have created a living hell in Iraq that rivals Darfur in scope and horror. Will the three stooges ever be made to pay any price for this disaster? They certainly should be.
