hey peopleFinally I saw 2001: A space oddysey! Only on 2 channel DVD,but was still impressive both to eyes and earsVisually,it was striking! < love the monkeys >Audibly,it was striking also!From the quietness of space to the breathing of the astronauts..Nearer the end when the Astronaut goes to jupiter,past infinity,thats crazy because it seems sane until then All in all,I really enjoyed it! I dont see many movies,but im glad i finally got this one out.Im gona watch it again tomorow before i return it.And to finish off with, saw "das boot" for the 2nd time,directors cut-talk about suspense!LOTR the two towers < yeh i know im late ,especially considering they filmed it here > enjoyed it too! Those trees have LF voices!CheersMike.e
