Yeah it was a phone conversation. I would rather not give a bad impression of any business servicing the DIY community, but at some point you need to provide some level of customer service.Let me ask you this; If I asked you for a 1nf capacitor, would you say"They don't come marked as 1nf". Am I out of line to expect that someone in the electronic parts business be able to convert from nanofarads to picofarads fairly easily? Should I be told there are capacitor conversion websites I can access? 1 part we are talking about, thats it, one part.I don't know , maybe it's me and my little 100 dollar order.
