I wish you all a merry Christmas.http://www.spaudio.com/My frind Stephen Paul passed away on the 22nd this month. He was a pioneer of the microphone modifications of vintage mics and gave neumann the secret to being able to produce a mic under 6 microns of element thickness. To date, SP has developed diaphrams with 0.7 micron thickness and rendered all the technology he presrented 3 years ago obsolete.May he be in peace.
Built on dreams look at his site.
