I wish you all a merry Christmas.<http://www.spaudio.com/>My frind Stephen Paul passed away on the 22nd this month. He was a pioneer of the microphone modifications of vintage mics and gave neumann the secret to being able to produce a mic under 6 microns of element thickness. To date, SP has developed diaphragms with 0.7 micron thickness and rendered all the technology he presnted 3 years ago obsolete.May he be in peace.

Built on dreams look at his site.
