Hear;hear;hear!!! You have struck the nail full force on the head. But first lets remmember those that shop at these glorified flea markets are not saving money. They are subsidizing health care and many other tax issues for Wal-Mart to steal labor from people who have no other options; through increased tax requirements to fund the shortfall created by the pathetic salaries and the pirated tax incentives offered these creepy Wal-marts and I am sorry but my dad always said you don't save by bying cheap goods. Let the shoppers refrain from needing all these gimcracks and tchochkies like little kids and frequent some American made quality stuff for a change. If you can't afford quality wait and save. Grow up. I love it whenever one of these sweatshops is prevented from building somewhere.
