The boys died for oil. George senior was a reasonable man who would not invade a soveriegn nation with the express purpose of taking their natural resources. The republican House was held in check by the Veto power of the Executive during the 92-2000 presidency; otherwise we would have been in an even deeper financial mess by now.Undocumented workers is a term coined by the Republicans.It is the Democrats trying to regulate immigration; the Republicans want to keep wages down.
