That should be sufficient I would think.We weren't talking about reserves now were we? We were talking about oil from Iraq imported into the US. So spare me the BS. Obviously you are wrong about the war being about oil and your not willing to admit it. Still haven't seen your answer regarding what you would have done. Also haven't seen your web site showing me wrong regarding the 2% figure I gave regarding imports of oil to the US from Iraq. Why or why are you answering these important questions.
