Geez; beautifull lady and a beautifull boat..is this heaven?The sound can get rough; a couple big wrecks in there. You need to cruise down in July and come around Owls Head into the Atlantic then down through the State Boat Channels into the Great South Bay and hang in Fire Island. You can chart through to Shinnecock then around Montauk and stay at Shelter Island.( Don't make a mistake in Navigation and end up on Plum Island!) I am in Hither Hills that time of year and would love to visit and chew the fat. That is a pretty popular trip for boats of your size. It takes about a week with days lay-over in Ocean Beach and Montauk Point. You end up around Orient Point and through the sound back to the Hudson. Lots to see and do. Total length is about 300 miles around the island. Pretty easy navigation because you are always in sight of land. Connecticut is accessible also.Boat drinks anyone?She is a beaut.
