So it seems they hate this stupid trespass on our rights and have requested it be disregarded. So have all the libraries and universities and every other reasonable citizen. The war is failling/the terrorists are coming in over the Mexican border/ no one likes the new Supreme ccourt nominee/ Delay is indicted/Carl Rove is next/ the rats are bailing out of the sinking ship. This is great!I hate to gloat but it is just so ironical and well;...just right.
